

Product leader applying AI at scale to drive real-world impact

Former Techstars founder and ML platform leader at Wayfair, now an AI Product Manager building outcome-driven platforms that translate customer intent into agentic capabilities. Currently leading the strategy and delivery of production-grade Generative AI systems—including LLM-powered Assistants, AI Agents, and RAG pipelines—with multi-million-dollar revenue impact. Partner with engineering, data science, design, legal, and business teams to operationalize large language models, retrieval-augmented generation, reinforcement learning, and real-time decisioning. Known for architecting scalable AI platforms, simplifying complex systems into intuitive product experiences, and delivering autonomous solutions that drive measurable, compounding growth.

AREAS OF EXPERTISE

AI Product Management • Generative AI & LLMs • AI Agents & Automation • Data Platform • Data Science • Strategic Planning & Execution • 0-to-1 Product Development • Cross-functional Leadership • Stakeholder Management

PROFESSIONAL EXPERIENCE

DAYFORCE • New York, NY • 7.2024 to Current

AI Product Manager

Designing extensible AI platforms that automate agentic development lifecycle and drive growth

- Led 0-to-1 launch of multi-lingual, GenAI-powered Assistant and AI Agents, delivering a prompt-driven experience that translated user intent into automated outcomes, resulting in fastest-growing SKU with multi-million-dollar revenue impact.
- Building scalable AI Platform with self-service tooling for Agent creation, evaluation and deployment. The reusable infrastructure enables feature teams across Workforce Management, Talent, Payroll to safely develop agents.
- Shipped production-grade AI capabilities across web and mobile by partnering with engineering, data science, design, architecture, legal, and governance, achieving 57% user adoption while meeting compliance requirements.
- Drove evaluation and optimization of GenAI performance by analyzing usage data and experimenting with large language model prompt strategies and feedback loops, resulting in a 25% lift in user satisfaction across a global customer base.
- Own the Agent interoperability and platform strategy, conducting customer, partner, and market research to design a unified abstraction layer for internal and third-party capabilities to be orchestrated through a single, extensible system.
- Set product vision, roadmap, positioning, and packaging in close collaboration with go-to-market, sales, and executive leadership, elevating the platform to a core strategic growth pillar and featuring it in CTO and CPO keynote presentations.
- Served as the product lead for a successful ISO42001 audit, partnering with legal, security, and data governance teams to operationalize responsible AI practices and ensure regulatory readiness across global deployments.

VERIZON • New York, NY • 1.2023 to 7.2024

Sr. Director of Corporate Data & Analytics Products

Established new enterprise data and analytics products supporting global finance and supply chain organizations

- Owned a \$100M+ data and analytics transformation program, delivering 22%+ efficiency gains across reporting and analytics solutions and enabling 80%+ same-day fulfillment through smart, dynamic inventory capabilities.
- Drove a multi-million-dollar vendor evaluation and RFP process across 6 vendors and 4 internal organizations, defining and governing 20+ service-level metrics to ensure performance, reliability, and accountability at enterprise scale.
- Managed global team in phased platform delivery beginning in early 2024, processing 7.5B records with <0.01% variance, and enabling 200+ reusable data products across 16 core business dimensions.
- Developed and communicated a multi-year product roadmap in close partnership with senior finance, supply chain, technology, and product leadership, aligning platform investments with strategic business outcomes.
- Built and evolved a portfolio of finance analytics products, including integrated planning and reporting with Oracle EPM, global sales commissions, environmental, social, and governance regulatory reporting, centralized KPI management.
- Delivered supply chain analytics products enabling near-real-time inventory visibility across distribution centers, order-to-pay monitoring to support same-day delivery, preorder and backorder reporting and vendor spend analytics.

AB INBEV • New York, NY • 7.2020 to 12.2022

Global Head of Data & Analytics, Z-Tech

Strategic leader within the innovation group of AB InBev, delivering AI products for Marketplace and Fintech ventures.

- Led ideation, development, and launch of successful e-Commerce AI algorithms: reinforcement learning algorithm that 2x engagement rate and increased order rate by 67%; a pre-checkout real-time cross-sell with A/B test showing 65% lift in average order value (AOV).
- Synthesized internal and external customer feedback to design and launch an AI-powered credit score across LATAM, delivering revenue increase of 24% (vs. 12% control group) in a six-month pilot program.
- Created roadmap and expanded ML platform to build out of feature store, automated training and inference pipelines, observability and other capabilities for both batch and real-time for 150+ models.

EXECONLINE • New York, NY • 11.2019 to 7.2020

Head of Data Analytics & Products

Developed the data and analytics product vision, strategy, and roadmap for an ed-tech platform serving enterprise clients.

- Driving force building, owning, and executing a solid data product roadmap empowering effective response to complex client questions with robust analytics and visualization dashboards.
- Oversaw cross-functional team of data analysts, data engineers, and contractors tasked with implementing the quality assurance process delivering a reduction in time to production by 50%.

WAYFAIR • Boston, MA • 4.2019 to 11.2019

Head of Product, Machine Learning Platforms

Developed ML Platform that were utilized across various Product and Marketing squads

- Partnered with cross-functional teams including AdTech, Data Science, and Marketing to launch A/B tests of user-level models for programmatic ad buying across multiple vendors delivering a \$1M in revenue and a 30% reduction in costs.
- Prioritized needs across business, data science and engineering to enable speed-to-deployment and value creation.

STARTUPS (TECHSTARS 2018) • New York, NY • 1.2018 to 3.2019

Co-Founder

Participated in Barclays Techstars 2018 program while continuing to refine product through continuous customer interviews.

- Led data scientists and developer to build bias-detection in writing application, leading to first revenue for company.
- Hired top talent, designed the revolutionary UI/UX and linguistic dashboard, and established technology roadmap.
- Recognized at the Computex as one of the top 20 worldwide start-ups and finalist in the NYU \$300K challenge.

EARLY EXPERIENCE

TE CONNECTIVITY • **Manager of Corporate Strategy & Global Head of VOC** • 2.2014 to 12.2017

NOMURA SECURITIES • **Associate, Financial Institutions Group Investment Banking Division** • 6.2012 to 1.2014

SAP • **Principal Consultant, Data Science** • 7.2007 to 8.2010

TECHNOLOGIES

Airflow, AWS, Azure, Claude, ChatGPT, Data Lakehouse, Data Warehouse, DataBricks, Deep Learning, Feast, GCP, Javascript, K8s, LangChain, LLM, MCP, ML Flow, ML Ops, MongoDB, OpenAI, PowerBI, Python, R, RAG, React, React Native, SQL, Tableau, Vertex AI

MASTER OF BUSINESS ADMINISTRATION (MBA)
New York University

BACHELOR OF ELECTRICAL ENGINEERING
Simon Fraser University

“Richard is the best hire I made as a Technology Executive. He's a strategic thinker on business value, extremely effective at communications and organizational change, and deeply technical to lead global data experts at implementing large-scale solutions”

- Luiz Gondim, VP & CIO, Johnson & Johnson
